

DO AS I DO .. WITH A DIFFERENCE .

EFFECT .

A pack of cards is placed on the table then your friend is asked to mix them well and to cut the cards into two portions, he then selects any half he wishes places same behind his back then -you do the same with the other half of the pack. You then ask him to give you any card from his pack that he wishes and you will give him a card from your pack which he should place face up in his pack and you will do the same in yours so that you will know them when the cards are brought forward. Now bring the cards forward and ask your friend to spread his cards so that he can see his card that is reversed and you do the same-yes you have guessed it both cards are exactly the same.

You now say, or your friend might say lets try it again so once more the same thing is repeated and once again both cards match this can be repeated again if you wish without touching the cards .

THIS CAN BE A VERY GOOD EFFECT AS THE CARDS ARE WELL MIXED ALSO YOU DO NOT SEE ANY CARDS AT ANY TIME LIKE IN THE USUAL SET UP OF THE DO AS I DO EFFECT . .SIMPLE ONCE YOU KNOW HOW .

WORKING INSTRUCTIONS.

Take any pack of cards and remove from the deck three sets of matching cards such as "King of Hearts and King of diamonds - Jack of spades and the jack of clubs -Seven of diamonds and the seven of hearts -now place each pair in the back of your belt or just at the top of trousers you are now all set I feel sure you can guess the rest.

When you take a pack and place it behind your back take a pair of the cards you have hidden and place on top of your pack one you give to your friend and the other you reverse in your pack, the card he gives you just push anywhere in the pack, so as you will see when they are brought forward they both match. Make sure however that you know which way the cards are facing at the back of you so that when you place them on your pack they are face down.

PATTER AND PRESENTATION.

Strange things happen with cards and the human mind plays a great part in contact with each other I would like to show you an experiment where both our minds work together. Now would you please mix the cards so that there is no cheating then cut cards and give me any half you wish now place the cards behind your back and for good measure give them another mix(This now gives you a chance to get the cards from your back on top of yours.) Now we are both going to select a card behind our back and so that we can identify same we will reverse them so that they are face up dont bring the cards forward until I tell you etc etc.
